

Our Company.

Beginning in the corner cubicles of a Vancouver BC office, Spark had one goal in mind: to do insurance differently.

Rather than just providing insurance to our clients, we aim to engage the individuals and small businesses within our communities. And how do we do that? With helpful educational resources customized just for you and an honest, secure, and user-friendly insurance buying experience.

It's time to make insurance into something more than just insurance. Let us show you the possibilities.

We Educate.

Wait, you don't know subrogation means?! Trust us, you're not alone. That's why we equip our customers with a variety of education tools and resources. Check out all the info you need to help your non-profit or charity flourish, including policies and governance documents.

Looks like you'll be an expert in no time!

We Engage.

At Spark, we have a passion for community. We understand how much you care about local involvement, and we want to be a part of that cause. Through scholarship programs, donations, and more, we hope to raise the bar in community engagement. Based on a number of strategic partnerships with Canadian organizations, Spark's participation in community outreach and online communication will redefine the role of your insurance and your provider.

Because our customers are no longer just our clients- they are our inspiration.
